

Sinai Pearl Beige/Grey, Galala, Dark Meli Grey Limestone Slim-Setts, Blue/Grey Limestone Setts New Sawn & Tumbled Finish, Square Setts & Indian Limestone/Sandstone Setts/Paving etc will contain blemishes, veining, small chipping (to the corners and sides) and small holes, all of which are natural characteristics of stone. Tolerances +-3-5mm on all axis's. These are positive characteristics and will enhance the appearance of stone.

The majority of the natural stone setts can be butt jointed however, we do recommend a minimum jointing gap of 5mm.

We suggest mixing paving/setts from crates prior to installation.

Always order an additional 5-10% to allow for wastage, cuts and the occasional piece which you may not like the look of.

All-natural stone will vary in colour, texture and natural markings.

Arbour Landscape Solutions will not give a refund or exchange stone on the basis of variation in colour, texture or natural characteristics.
