

Sinai Pearl Beige Honed Pre-Sealed Tumbled Limestone Paving

The beautiful natural stone paving offers an affordable option for both Traditional and Modern garden designs. This timeless material has bags of character and with every piece being unique you can be assured that your client has something that stands out with inherent natural beauty.

Sinai Beige Limestone paving is generally a warm beige colour and will include a combination of natural quartz veining and fossilisation. Natural colour variation, and occasional pitting, can occur and we have chosen the HONED SURFACE AND TUMBLED TOP EDGE to minimise the chipping which can sometimes occur with limestone.

Responsible sourcing is important to the Arbour Landscape Solutions team and you can be assured that these pavers have been produced in a quarry where the environment and the workers are treated with the utmost respect.

For your convenience, these pavers have been pre-sealed so that you don't need to handle chemicals on site or mess around trying to do this extra job.

Product Information

- 900mm x 600mm x 20mm x 30 per pack x 16.2m² - 875kg
