

# Sinai Pearl Beige Honed Pre-Sealed Tumbled Limestone Square Setts

Create beautifully refined landscaping features with our Sinai Pearl Beige Tumbled Limestone Setts. Expertly crafted with a smooth honed surface and tumbled edges, these timeless limestone blocks bring a luxurious yet natural feel to any outdoor space. The warm pearl-beige tones are enriched with subtle veining, quartz details and occasional fossils, giving every piece its own unique character. Factory pre-sealed for added protection, they're perfect for pathways, patios, edging and courtyard designs, and pair effortlessly with our Sinai Pearl Beige Limestone Paving for a coordinated look.

Natural veining, occasional pitting, small chips on the edges and mottled colour variations enhance the natural beauty of this luxurious stone. Colour variations always occur to some extent, even in the same batch, carefully mix the tiles to achieve a harmonious appearance of colours and shades.

Rust marks may appear in the stone due to iron and mineral within the stone. This is not a fault. They maybe more visible when the tiles are wet, and may become lighter in colour after installation, in dry conditions and over time. Do not use acid based cleaners on limestone paving.

# Product Information
