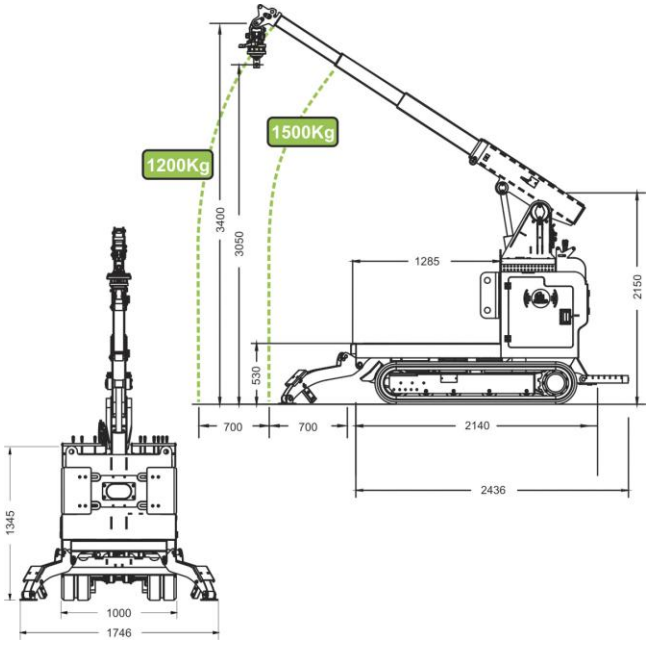
Hooka - Lift & carry Crawler Specification Sheet

Kerb weight (empty): 1800Kg

Max lift / carry capacity: 1500Kg (see load rating chart below)

Max Gross weight: 3300Kg

Honda powerplant - emissions compliant



Track length (Ground contact): 1450mm

Overall width (tracking mode): 1000mm

Machine footprint: 1.45m²

Ground Loading :
Kerb wgt (empty): 1241Kg/m²
With max load: 2275Kg/m²

Note: As the Hooka runs on tracks its 'point loading' pressure is already very low. However, the overall ground loading (Kg/m²) of the machine can easily be reduced even further by running the machine on top of standard 'trackway' materials to spread the load over a wider area.
